

# Milk Jug Igloo

## Tips for construction:

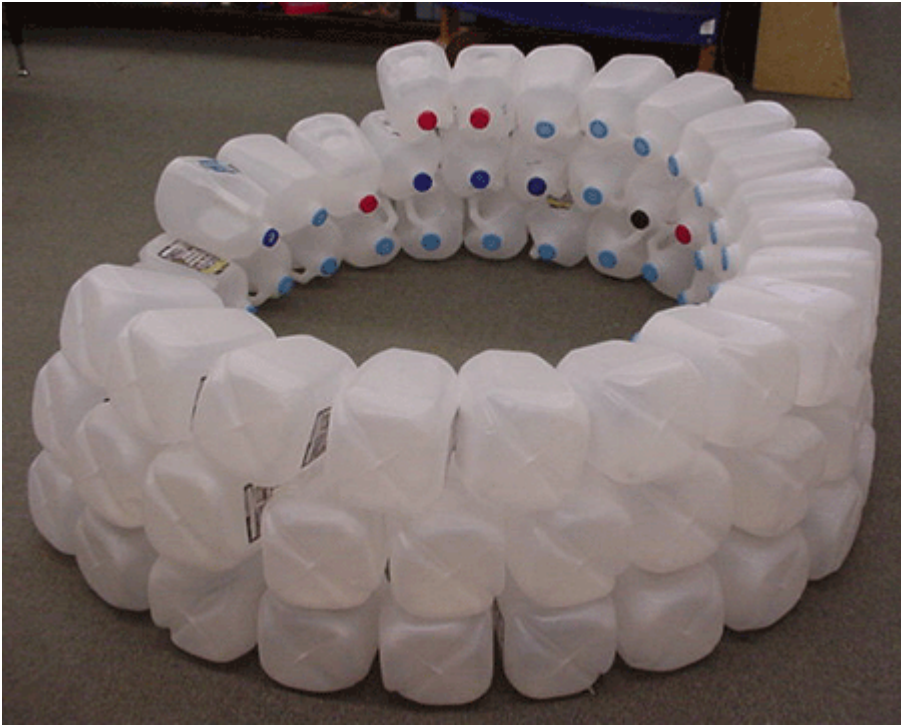

1. Make sure you wash each gallon thoroughly and rinse w/ a mild bleach solution and allow to dry.
2. Hot glue or 'Fabri-tac' the jugs together
3. Use a yard stick to support the opening for the door at the bottom and arch.
4. Let friends and neighbors know you are building so that they can save their milk jugs for you.

Jugs

22 Plastic Milk  
Jugs

22 Plastic Milk Jugs

Use a yardstick to support the 5<sup>th</sup> row---the top of the door's archway

Continue reducing the number of jugs you use for each row and tip the jugs inward.

This igloo took 155 milk jugs to complete.
